

A Global Medical Electronics Device company requires new members of its team to expand its production facility in Caldicot South Wales.

Assembly Operators and Junior Technician - Trainee.

The positions are full time based on 37.5 hours per week, Monday to Friday. with 4 weeks holiday per year plus bank holidays.

The successful applicants will undertake basic product assembly instruction, which will include:

1. Use of soldering equipment
2. Assembly techniques
3. Product assembly.
4. Mechanical assembly
5. Product testing
6. Product packing
7. Application of Medical standards (BS EN ISO 13485:2016)

This will lead to the assembly of medical devices for sale and use within hospitals.

The successful Junior Technician will, after completion of the first years employment, gain the option to enrol on a day release BTEC engineering course sponsored by the Company.
